Graduation Is Upon Us
Kindra Beaumier, Maverick Reporter

Congratulations to the upcoming graduates. Whether transferring to another college, university or entering the career world, every step taken has been a step closer to those goals. Be proud of the accomplishment; it is a major milestone in pursuit of a successful future. Some of us may have been detoured by life or we are still on track for where we are headed. Then again, there are those of us who are not sure where we are going. We are just moving along the path that is set in front of us hoping we can figure it out as we go. Then there are those who started one direction and ended up somewhere else different.

In my younger days, I had all the best intentions of finishing college with a business degree. Due to circumstances beyond my control I was not able to finish college at that time. Life got in the way and there were more pressing things that needed to be done. While being out in the world, I continued to try to take courses where I was that would help me some day complete my degree.

So coming full circle, I not only returned to Oklahoma but I am also finishing my degree and graduating this semester from Northern Oklahoma College, where my journey began. Some may ask: If there is anything I could change would I change anything? I would have to say no. If I had not had all those events in my life as they were, then I would not be the person I am today. Working with others at NOC has allowed me to see the world in a whole different light. I now see how others view the world. Attending NOC or another higher learning institution is an experience I would recommend for anyone at any time in his or her life. My world has turned around due to attending college. The teachers and advisors have helped me find a new path that I had never considered before. I am not sure when my head will stop spinning around from all the experiences I have had while in college. I believe it will be a while before it does quit spinning due to the fact that I enrolled for the 2015-2016 year to add an English major to my Mass Communications degree.
Audiobooks
Joel Si McBlair, Maverick Reporter

Do you ever get tired of music while driving? Do you ever feel like you could make better use of your commuting time? Do you want to make general improvements to your life? If you answered yes to any of the questions above, then continue to read.

Sometimes listening to the car radio or a personal playlist can be very pleasing to the ears. Then there are other times where an interesting story to listen to or some knowledge that can help improve your life comes into play. That is where audiobooks come in handy. There are so many different audiobooks available for the various listening moods that you are in.

One of these books is Gone with the Wind. It is a book many might want to read but then they look at the size of the book and they say, “No way!” Audiobooks can help a person to enjoy this tale without actually having to sit down and read that colossus of a book.

Audiobooks can also help those of you who like to read books but lack the time to sit down and read. Commuting times to school and work can vary. You spend hours every week commuting. Let’s say you spend about one hour in your car a day. In a year’s time, you have spent about 365 hours. What if you spent half of those hours listening to audiobooks? You would spend about 182.5 hours broadening your horizons or enjoying numerous stories. Listening to audiobooks can make practical use of this valuable resource called time.

There are also numerous self-help audiobooks that are available. Some of these are The Seven Habits of Highly Effective People, Good to Great and How to Win and Influence People. These books can help you learn valuable habits. They can teach you to improve your business and finances.

Another important area they can help in is communication and relationship skills. If these audiobooks can help you to become more intelligent, more in control, increase your self-esteem and make you a more marketable employee, then why not listen to audiobooks?

By now you may be wondering where you can find audiobooks. You can find audiobooks at some local libraries. Another good source is the app Overdrive which allows free downloads of audiobooks. A commercial source to find audiobooks is local bookstores. An online commercial source is Audible, which has an immense catalogue of audiobooks at reasonable prices.

Audiobooks can enliven an ordinary commute with very interesting tales. They also aid in making practical use of time.

Another valuable thing you can get from audiobooks is in the area of self-improvement. They are abundantly available. So if you get tired of music, consider getting an audiobook.

NOC girls’ basketball camp announced
Applications for the NOC Lady Mavs summer girls’ basketball camp are now being accepted, according to Northern Oklahoma College Head Women’s Basketball Coach Greg Krause. Camp dates on the Tonkawa campus are June 1-3 for girls entering Grades 1-3, June 21-26 for girls entering Grades 3-6 and July 5-10 for girls entering grades 7-12.

Grades 1-3 camp is a day camp from 9 to 11:30 a.m. for commuters only. Two lowered goals will be used for teaching offensive skills. Basics such as dribbling, passing, defensive and varied offensive skills will be introduced.

Grades 3-6 and Grades 7-12 camps are overnight camps, and commuters are accepted. Girls entering Grade 3 may register for either Grades 1-3 camp, Grades 3-6 camp or both, Krause noted.

The training includes mass drills, station drills and team transition offense skills, such as floor balance, filling lanes, court spacing, advancing the ball and proper shot selection. Competitions in one-on-one, two-on-two and three-on-three drills, a free throw contest and league games are part of the daily schedule.

"Air conditioned dorms house our campers," Krause said. “Two gyms are available, the main gym being air conditioned. Also, a six-lane, Olympic-size indoor swimming pool is open for the campers’ use, and our college cafeteria provides meals.” Each camper will receive a T-shirt and a regulation size camp basketball. Advance registration is requested since enrollment is limited. After the application and deposit fee are received, an acceptance letter and detailed information will be sent to the camper.

A brochure, schedule and application form can be found on the NOC website www.noc.edu/lady-mav-basketball-camp.

For more information contact Krause at 580.628.6733 or greg.krause@noc.edu.
Natural Confidence
Gary Americanhorse, Jr.
Maverick Reporter

Advice for life is all around us: in books, audio files, videos and websites. However, I have found through personal experience that curiosity and wanting knowledge of helping myself is all around me. It is mostly relationship advice and related topics, but the information can be used in any and every aspect in life. What I have discovered is that most advice relates to self-confidence.

One way to gain self-confidence is to eliminate the fear that prevents us from doing things we want to do. This is what keeps a majority of people from being naturally confident. Fear of failure can be conquered. The best way is to just remember that survival exists even after the aftermath. Most people will respect the confidence exhibited for pursuing a dream. If dancing is the dream, then the right mindset exists. However, it is not easy done), looking your best (clothes clean and neat) and you will gain a confident appearance.

There are other techniques to gain confidence but these are a good start. They are the basics and everything needed to be confident. So remember to not let fear stop you. Have a good mindset, smile and look positive. Always try to practice good hygiene and look great.

Now appearance is where I may lose or confuse some, but do not fret. Here are a few suggestions towards appearance: have good hygiene and look great. It does not mean to look like prom night. It just means look tidy and presentable. Good hygiene is one way to achieve confidence. I know people who refuse to believe in poor hygiene because in the past, it had not caused them problems. They have confidence in themselves that is not healthy. They have false confidence. People need that “I am a person of high caliber” confidence, which means that they practice good hygiene. Looking the best is simple. Just make sure clothes are not wrinkled, too stained or ripped. Make sure the fit is right, not too tight or too loose. Use makeup if needed. Do not overdo it or it will look like you rely too much on make-up. Good hygiene (bathed/showered, clean teeth, hair done), looking your best (clothes clean and neat) and you will gain a confident appearance.

What is NLP?
Joel Si McBlair, Maverick Reporter

Let me tell a story of an individual who encountered many things that terrified him on a daily basis. This fellow encountered many people who were hostile and were difficult to communicate with. On top of this, he spent most of his waking hours thinking about negative experiences he had in his past, such as a terrible breakup with his girlfriend, a coworker who bullied him and an argument he had with his parents.

Then this man studied NLP and it made a positive difference in his life and has helped him to get over his unfounded fears, improve his communication skills and helped him to change the emotional state he was in.

What is NLP? NLP is an acronym that stands for Neurolinguistic programming. NLP is considered by some scientists to be a pseudoscience that is not clinically proven to be an effective therapy. Others have claimed, as in the story at the top, that NLP is an effective therapy that has made a significant difference in their lives. To help break NLP down, here are a few of the techniques of NLP.

NLP has helped some to overcome their fears. How? Richard Bandler, one of the founders of NLP, claims that there are only two natural fears: the fear of falling and the fear of loud noises. Other fears are learned. Some fears are somewhat beneficial, such as the fear of rattlesnakes. There are other fears that are not beneficial: such as turning a doorknob, being afraid of the opposite sex and public speaking. Basically, fears can be learned or unlearned.

What is NLP? Continued from p. 5

Bandler's books The Ultimate Introduction to NLP, Get the Life You Want, and Nicholas Boothman's book How to Make People Like You in 90 Seconds or Less. This has been a very brief description of NLP. NLP has been beneficial to many. Even though there are some critics of NLP, as there are with other forms of therapy, it is a therapy that can help one to overcome fears, become a better communicator and get into a positive state.

Call for Student Videos/Films

The Digital Media Institute at Northern Oklahoma College would like to invite all students to submit a short video into the 8th Annual Epic Shorts Film Festival. Epic! It's a word that describes something so surprisingly delightful, so exceedingly impressive, and so unequivocally unbelievable, that you can't put anything else on the scale with it.

We invite and challenge you to show us something EPIC -- whether that's your sci-fi drama, outrageous comedy, or a samurai action flick; we want to see it. The catch, you got ten (10) minutes to show it.

Break out those cameras. The deadline is April 22nd. So get busy, get creative, and be original. We are very excited about the opportunity for students to showcase their visual talents. The festival is open to all students.

All proceeds will benefit JDRF (Juvenile Diabetes Research Foundation).

Judged by selected jury

Prizes are as follows:

- Storyline
- Creativity
- Cinematography
- Composition
- Editing
- Sound
- Overall Quality

Prizes: 1st Place: $100, 2nd Place: $50, 3rd Place: $25

Audience Choice: $25

NOC Sponsors Contest

April Fool’s Day was exciting as junior high and high school students participated in the Northern Oklahoma College Interscholastic Contest on the Tonkawa campus. The event, held on April 1, included 21 schools, 718 entries with 460 students participating. Students may take two examinations.

There were 31 exams covering areas such as Accounting, Art, Biology, Chemistry, Algebra I and II, Spanish I, French I, English I, II, III, and IV, Photography, World History, World Geography, American History, Oklahoma History, Computer Science, Economics, PowerPoint, Word, Math Analysis, Plane Geometry, Chemistry, Physical Science, Physics, Nutritional Science and Agriculture I and II. New exams this year were Spanish II and Spanish III.

Medals were given to the first, second and third place winners in each contest at an awards ceremony in Wilkin Auditorium. Scholarships are also given to juniors and seniors who placed first, second and third. All participants receive a certificate of merit.

PLC students, under the direction of Dr. Cathy Moore, served as proctors, on-stage presenters, registration and assisted faculty with examinations. The event, under the direction of business instructor Laura Marshall, is held the first Wednesday of April each year. “We currently have 90 first, second and third place winners in each contest at an awards ceremony in Wilkin Auditorium. Scholarships are also given to juniors and seniors who placed first, second and third. All participants receive a certificate of merit.

PLC students, under the direction of Dr. Cathy Moore, served as proctors, on-stage presenters, registration and assisted faculty with examinations. The event, under the direction of business instructor Laura Marshall, is held the first Wednesday of April each year. “We currently have 90 schools interested in the competition. This year we saw participation from schools that haven’t competed before. This is exciting to see more junior high and high schools interested in the competition,” said Marshall.

How to Save Money in College

Ladies, enter the Miss NOC pageant. Yes, it’s scary, but totally worth it. Every contestant receives $200 scholarship towards tuition just for participating. Second runner up receives $400, first runner up receives $600 and Miss NOC receives $1000 scholarship towards tuition.

Rent or buy used books

Books can be expensive, and a real pain in the rear. Buy used books or just rent them. Don’t forget to sell the books back at the end of the semester to get some of that cash back in your pocket.

Apply for a job on campus and saves lots of time and money from traveling. There are many options to choose from: can enter ranging from cleaning to receptionist or even helping out in the cafeteria. It makes it easier for students who live on campus to earn money while keeping up in school.

Make your own fun

Friday night and you’re bored, I get it. The last thing you want to do is save money and stay in. Skip the movies and invite a few friends over to the lobby and have a movie marathon and pop your own popcorn. Get a group and have a swim party in the pool on campus. Play volleyball or even basketball in the Wellness Center. These are all things you can do with little to no money and is sure to be a good time.

Eat In

If you have a meal plan, use it. Don’t go to Sonic every night when you are already paying for a meal on campus. There are many options to choose from: can enter ranging from cleaning to receptionist or even helping out in the cafeteria. It makes it easier for students who live on campus to earn money while keeping up in school.

Look for scholarships

Start applying for as many scholarships as you can. Even receiving a scholarship for $100 can really help when it comes to the “small things” people tend to forget about. Try out for a sport. Most of the time you will receive a scholarship if you make the team.

Buy a few real dishes, a sponge and dish soap at the beginning of the year and save money on paper cups and plates. Buy a water filter and refill your water bottles.

If you have a meal plan, use it. Don’t go to Sonic every night when you are already paying for a meal on campus that provides you with a great variety of food and drinks. Buy a few real dishes, a sponge and dish soap at the beginning of the year and save money on paper cups and plates. Buy a water filter and refill your water bottles.
NOC Tonkawa Nurses Pinning Set for May 2

The Northern Oklahoma College Tonkawa Nursing Class of 2015 will receive their nursing pins from family members or friends in a special pinning ceremony to be held in the Kinzer Performing Arts Center on the Tonkawa campus at 12 p.m. Saturday, May 2. The distinctive pins signify completion of their Registered Nurses’ education at Northern.

Marriya Wright, RN, MSN, will be the guest speaker for the occasion. Following the ceremony, a reception and slide show presentation, open to the public, will take place in the Renfro Center.

The Student Spirit of Nursing Award will be given to the student who because of his or her knowledge, attitude and leadership embodies the best example of a nurse. Selection of the recipient is made by secret ballot of the class. The annual Faculty Spirit of Nursing Award, determined by secret ballot of the faculty, will be presented to the student exhibiting outstanding qualities of leadership, attitude, caring, intelligence and knowledge.

The Northern Oklahoma College Nursing Program is fully accredited by the Accrediting Commission for Education in Nursing and by the Oklahoma Board of Nursing.

Marriya Wright, RN, MSN, will be the guest speaker for the occasion. Following the ceremony, a reception and slide show presentation, open to the public, will take place in the Renfro Center.

Cheerleading Tryouts Held!!

Moore Iron & Steel Corp. Celebrating 2012 with our 10 year anniversary of servicing our Asphalt, Ethanol, crude oil, chemical, food handling and our special 1,000 brl, IFR, API 650 storage tanks.

MISCO is an in-house, shop built or field erected custom storage tank fabricator and contractor. We are centrally located in the United States with the ability to ship or field erect any of your job needs. We are well suited to adapt to a multitude of different manufacturing applications.

We specialize in manufacturing shop and field erected tanks, vessels, as well as plumbing and installing entire facilities.

Moore Iron & Steel is located in Yale, Oklahoma you can contact us by phone @ 918.387.2639 or Fax @ 918.387.2631 if you would like to discuss what we can do for you or if you have any questions about how soon you would like for us to work for you.
How To Make Your Dorm Room Feel Like Home in 10 Simple Steps.
Alexis Moore, Maverick Reporter

1: DIY Headboard
What you will need: Cardboard or plywood, measuring tape, scissors, staples, quilt batting, and fabric.
1. Cut a piece of cardboard (or plywood) to the headboards determined shape and size.
2. Lay the cardboard over quilt batting and cut a 2 inch perimeter around it.
3. Fold the extra 2 inches over the cardboard and staple into place.
4. Iron the fabric to give it a clean professional look.
5. Lay the headboard on the fabric and cut leaving 2 inches around the perimeter.
6. Fold fabric over and staple tightly starting from the center of the top and bottom and working your way out.

2: Throw Pillows
Adding a few throws to your bed adds comfort, mentally and physically. The look is soft and inviting. The feel makes it easy to sit up and do a little homework in the comfort of your own bed.

3: Memory Foam
Even a few inches of memory foam will make the worst dorm mattresses feel significantly better. That's when having a twin sized bed pays off… CHEAP

4: Carpeting
The cold tile floor is the last thing you want to touch first thing in the morning. Buy a rug to add softness and comfort. You can find them cheap at stores like Ross or TJ Maxx. If you want something more, go for remnants of carpet at a hardware store such as Lowes.

5: Plants
Adding a few small plants around the dorm adds life and color. Some plants even help to purify the air in a stuffy dorm room. When choosing the plant best for you keep your lifestyle in mind. If you want something with low maintenance, a cactus would be a great contender. If you have a little more time to spare get a plant you can tend to often.

6: Wall Décor
Dorm room walls tend to look like a prison cell. Don’t worry, we have a solution. Wall decorations such as paintings and meaningful pictures are sure to make your dreary room feel more like home.

7: Curtains
Curtains give control to the amount of light coming into your room. This is perfect for nap time. Curtains also add life to plain walls and give the room a sense of softness.

8: Extra Lighting
There will be times when you stay up late doing homework while your roommate is trying to sleep. For that reason, lamps are a must have in college. They give a room the relaxing feel you deserve after going to classes all day.

9: Refurbished Furniture
Add your own style by taking an old nightstand or bookcase and giving it a facelift. Paint it your favorite color to give your room a more comfortable feel. Make sure you will get a lot of use out of the piece and that it won’t take up much room.

10: Extra Seating
Be the host everyone is talking about by having a comfortable place for new friends to sit and chat. Extra seating in a room is inviting and frees up your bed. This is sure to give your dorm room the final touch to make it feel like home.

P.S. I would love to hear your suggestions for the next “How To”. Contact TheMaverick@noc.edu to have your suggestion heard.
Yoga
Northern Oklahoma College has a yoga class. Enroll and relieve stress by stretching, all while earning credit hours. This is a great way to get exercise as well.

Cleaning
Cleaning will help you organize your thoughts and collect them before tackling that next final exam. A clean room helps you have a clear mind.

Sleeping
Sleep plays a huge role in the amount of stress your body contains. Your body needs sleep to function properly. Try going to bed earlier during finals week and get that beauty sleep.

Healthy Eating and Exercise
The most important thing to do to get rid of stress is to stay healthy. This includes eating and drinking right and exercising. Try drinking water instead of soda. Go for a jog. Enroll in that yoga class. Exercising alone will help you clear your cluttered mind.

How to Relieve Stress during Finals Week
Alexis Moore, Maverick Reporter

Coloring
Coloring gives you a sense of mindfulness and gives your brain a break. Psychology Magazine says, “This gentle activity, where you chose the colors to create your picture and the repetitive action of coloring it in, focuses the brain on the present, blocking out any intrusive thoughts.” Buy a coloring book and a box of Crayola’s before your next exam!

Birds of Clay at Aura
Joel Si McBlair, Maverick Reporter

This past semester, a sculpture was carved of birds that one may encounter in the Oklahoma environment. The sculpture was created by NOC students Anna Colpitt, Marissa Layton, Joel Si McBlair and instructor Audrey Schmitz. The sculpture can be seen in the Kinzer Performance Arts Center.

This is a photo of the initial drawing after research was done on what kind of birds one could encounter in Oklahoma.

Then there was a serious of dots impressed into the clay to get the overall outline established.

This is the end product that can be seen in the art show.

The carvings were then used to create the cast.

More clay was then scooped out, creating a sense of depth.

This is how the molds looked after they hardened.

Detail was then put into the relief to which added more detail and enhanced the realism of the sculpture.
Case is a 6’3” right handed pitcher and an outfielder for NOC’s baseball team. Case is a Pre-Engineering major who attended Ponca City High School. He wants to play baseball at a 4-year college and later play professional baseball. Case grew up playing baseball and loves the environment of it.

His favorite things at NOC are to play baseball, go to the baseball field and to hit in the batting cages. His favorite teacher is Mrs. Hook.

Corey used to play football since he was little, with a “heck of a throwing arm”. However, his sophomore year, his dad encouraged him to try baseball. His favorite part of the game is to throw really hard and have a great team watching his back.

Corey is one of NOC’s right handed pitchers standing at 6’2”. His favorite place is on the baseball field. He is a Criminal Justice major. His favorite class is Comp II with his favorite teacher, Mr. Haywood.

He went to Northeast High in Fort Lauderdale, Fla. He likes how homecoming brings people together to bond but not as much as he likes working out. He is not ready to leave NOC, he’d rather continue living in this moment. When he does leave, he wants to go to a 4-year school. His dreams after that are to play professionally or join the Coast Guard.

Carson is a hilarious Maverick softball player who comes from Owasso High School. Though she may be 5’2”, she’s a quick catch outfielder. At 4-years-old, Carson began playing softball with a push from her parents.

Though she would love to go to a four-year college and continue to play softball, her plan is to attend nursing school. Later on in life, she would love to get married. For now, Carson doesn’t want to leave the comfortable environment of NOC. She loves hanging out with her friends and making new ones. Her favorite classes were Anatomy with Mrs. Moore and Nutrition with Dr. Campbell. Her favorite teachers include Dr. Campbell, Mrs. Pennington, Ms. Sharp and Mr. Pearcy.

Dubose said, “I want to thank my parents for all their support, my Nay-Nay, my boyfriend Joe and finally my teammates who always have my back.” Her favorite quote “Cherish Every Moment.”
Meet the Mavs: Softball
Liz Ricker, Maverick Reporter

From Anadarko High School, Dani plays shortstop for the Lady Mavs. When Dani’s father started her in softball, the competitiveness of the game got her hooked. Some of her favorite memories come from softball.

She would love to further her softball career and keep playing. Dani is an Art major and wants to graduate with a Bachelor’s in Art. This makes the art room her favorite place to go at NOC. She loves both art teachers, Ms. Schmitz and Mrs. Kodesh, as well as Coach Berlin and Coach Neale.

She enjoys spending time with friends and meeting new people. This is part of why she doesn’t want to leave. She says, “I know it’s my time but I’m just going to really miss it.” Her dream is to be successful, start a great career and marry her boyfriend.

Reynolds gives a shoutout: “to my parents, thank you for always being there and supporting me through everything.”

Kelby Alexander #4

Kelby plays third base for the Lady Mavs. Her mom introduced her to softball when she was four. She loves how competitive it is. She graduated from Drumright High School. Kelby’s major is Behavioral Science.

She later wants to go to a four-year school, graduate, become a psychologist and marry her boyfriend. Her favorite class was Addictive Behavior with Coach Bay. Coach bay also happens to be one of her favorite faculties along with her other coaches and frost.

She loves going to the field and hanging out with friends.

Alexander gives a shout out to: “My mom for pushing me to be the best, as well as my boyfriend for being so supportive.”

The Northern Oklahoma College Governor’s Cup team, Magnetic Solutions Inc., won the Robert E. Craine Outstanding Venture Award on Thursday, April 16, 2015 in Oklahoma City at the Chevy Bricktown Event Center. This is the first time this award has been given to a team and Northern Oklahoma College was the only two-year community college to win an award in the Governor’s Cup this year.

The Robert E. Craine Outstanding Venture Award was created in memory of the managing director and CEO for TSF Capital in Tulsa. He also was a mentor and former judge for the Governor’s Cup. Mr. Craine was responsible for the development of the competition and encouraged entrepreneurship across the state. This award is presented to a team with the best investor potential.

The Magnetic Solutions Inc. team consisted of Brenna Lane, Electrical and Environmental Engineer major; Edgar Delgadillo, Business major; and team leader Gregory Cusick, Business major. Team advisor was Laura Marshall. The idea of Magnetic Solutions Inc. is the use of electromagnets and superconducting magnets creating a generating system that could replace engines and turbines to be run without the use of coal or other fossil fuels. OG&E is in negotiations with Magnetic Solutions Inc. to develop a prototype to operate the systems at the Sooner Power Plant. This could be a potential savings to OG&E generating system that could replace engines and turbines to be run without the use of coal or other fossil fuels. OG&E is in negotiations with Magnetic Solutions Inc. to develop a prototype to operate the systems at the Sooner Power Plant. This could be a potential savings to OG&E of $70 million per generator, if utilized.

Other uses for this technology would include desalination plants and equipping semi-trailers with these generators used in hurricane-stricken areas such as New Orleans providing power in 24-48 hours.

Mr. Delgadillo has balanced his coursework, playing soccer for NOC, active in PLC, maintained an internship and his work with the Governor’s Cup. Ms. Lane also plays on the NOC softball team.
Induction Ceremony Held

Phi Theta Kappa and Kappa Beta Delta held their joint induction ceremony April 12 at the Renfro Center. Phi Theta Kappa had 48 new inductees this year with 25 attending the ceremony. Phi Theta Kappa is the international honor society of two-year colleges and academic programs, particularly community colleges and junior colleges.

Kappa Beta Delta had a total of six new inductees this year. Two attended the induction ceremony, Rebecca Douglas and Lori Fancher. Other inductees include Heather Hoecker, Hunter Payne, Sarah Ashley Pugh and Rikke Randrup.

Kappa Beta Delta is a national honor society which was established in 1997 at the annual conference of the ACBSP to recognize students only in accredited associate degree-granting institutions for their high academic achievement in business programs.

The keynote speaker for the event was Jon Archer. Archer is currently a Senior Agent Regional Development Manager for Bankers Life and Casualty and has been with that company for the past eight years. He currently serves as a member of the NOC Business Advisory Board and has provided internship opportunities to NOC students.

Phi Theta Kappa sponsors are Robin Ruyle and Tracy Emmons. Kappa Beta Delta sponsors are business division instructors Jill Harmon, Cara Beth Johnson, Laura Marshall, Bart Allen and Gene Laughrey.
### Final Examination Schedule

#### Spring 2015

**Tonkawa and Enid**
