

INTERNSHIP REQUIREMENTS

All interns are responsible for understanding and complying with the internship policies and requirements of Northern Oklahoma College. Failure to comply may result in a lower grade than anticipated.

You should not commit to work with any potential internship host until you have had a preliminary discussion and approval to do so from the Dean of Academic Services or a faculty member in your area of concentration prior to approval.

While we encourage you to complete an internship whenever it can best work into your program, also consider completing an internship during your final semester of enrollment. If the internship is successful, you may want to pursue, or be offered, employment with the organization upon graduation.

Credit for the internship must be earned in the term for which you are registered.
