Black History Month celebrated Saturday in Enid

The NOC Diversity Committee is sponsoring a Black History Month Program Saturday, Feb. 26 in Enid.

The event will be held at Briggs Auditorium at 5 p.m., according to MaryAnn McCoy.

McCoy said the Enid Community Choir will perform with Praise Dance Teams from area churches. She will also provide an origin of Black History Month and will detail African American contributions.

NOC President Dr. Clark Harris and Vice President for Enid Jeremy Hise will also provide remarks at the event.

Also, the 2022 Rev. Martin Luther King, Jr. Poetry and Essay Contest Winners will be featured.

The NOC and Enid area communities are invited.

The program will be live streamed on the NOC website: <https://www.noc.edu/athletics/streaming/noc-events-streaming/>

African American contributions

Garrett A. Morgan invented the automated traffic signal in 1923. Morgan sold the rights to his patent to General Electric for \$40,000.

Frederick McKinley Jones invented the portable air conditioning unit used at military field hospitals in World War II. With the use of this invention, the military was able to store perishable, life-saving medicines and blood serum

near the theater of battle, helping to save more lives. In 1935, Jones invented the first refrigerated truck.

Madam C.J. Walker was the first American woman to become a self-made millionaire. Her business was worth more than \$1 million at the time of her death in 1919. She developed hair care products and styling instruments specifically for the needs of black women.

Dr. Charles Drew discovered the technique of storing blood plasma. As a result of this discovery, the first blood bank was formed and many lives have been saved through transfusions of blood and blood products.

Granville T. Woods invented the multiplex telegraph in 1887, a device that allowed train dispatchers and engineers at various stations to communicate with moving trains. Prior to that, collisions were a huge problem. In 1889, he invented an automatic safety cutout for electric circuits.

In 1892, George T. Sampson received the first U.S. patent for a clothes dryer.

Richard Spikes, in 1913, invented automatic directional lights, which would eventually come to be known as automatic directional lights or turn signals.

Percy Julian developed a material known as "bean soup," a soy protein blend that extinguished gas and oil fires that could not be put

out by water. This mixture saved the lives of countless sailors during times of war. In addition, athletes all over the world can thank him for the production of cortisone, which has eased the sufferings of millions.

Elijah McCoy invented the automatic oil cup, which lubricated a train's axles and bearings while it was in motion, leading to fewer stops and improved safety. It was a huge success that imitators soon tried to cash in. Engineers, though, continued to prefer McCoy's product. So, when purchasing the part, they'd ask for "the real McCoy," coining that expression.

In 1883, Jan Ernst Matzeliger developed a machine that would sew the sole to the upper of a shoe in about a minute. His "shoe lasting" machine changed the process of how shoes were made by automating this part of the process that previously was done by hand, thereby cutting the cost of making shoes in half.

In 1882, Lewis Howard Latimer invented a method of making carbon filaments for what became known as the electric incandescent lamp.

George Crum developed the potato chip in 1853.

Dr. Patricia Bath, an ophthalmologic surgeon, invented the Laserphaco Probe, a surgical tool that uses a laser to vaporize cataracts.

In 1892, Sarah Boone improved upon the 1858

ironing board. Her board featured a narrower and curved design, making it easier to iron garments, particularly women's clothing. Boone's design would morph into the modern ironing board that we use today.

In 1887 Alexander Miles took out a patent for a mechanism that automatically opens and closes elevator shaft doors and his designs are largely reflected in elevators used today.

Thomas Elkins—modern toilet. In addition to other inventions, Elkins created the chamber commode in 1872. It included a mirror, washstand, mirror, and more.

Frederick Jones—refrigeration machine. Jones was a self-taught engineer with a number of important inventions. His most notable invention was a refrigeration machine used to transport blood, food, and medicine during World War II.

Richard Spikes invented the automatic gearshift. Driving up a steep hill got a whole lot easier in 1932, thanks to this African American inventor.

Joseph Gambol invented the super charge system for internal combustion engines.

Alice Parker invented the heating furnace. Forever changing the way we stay warm in the winter.

(See **Black History Month** on Page 2)

Black History Month

(Continued from Page 1)

John Burr invented the lawn mower. The lawnmower's best makeover ever brought better traction, rotary blades, and allowed cutting closer to buildings.

Joseph Smith invented the lawn sprinkler to keep our lawns from becoming brown and wilted.

Thomas W. Stewart invented the mop. He's kept us off our hands and knees since 1893.

Albert R. Robinson invented the electric trolley, which was the precursor to the rapid transit system of today.

Charles Brooks invented the street sweeper, which helps to keep our streets from being cluttered with paper and other debris.

These inventors helped improve our means of the written word (newspapers, magazines, books, etc.). John Lee Love invented the pencil

sharpener; William Purveys invented the fountain pen; Lee Barrage invented the type writing machine; and W. A. Love invented the advanced printing press.

The US Postal Service would not be able to transport letters, articles, and books, because William Barry invented the Postmarking and Canceling machine; William Purveys invented the Hand stamp; Philip Downing invented the letter drop, and Phillip Downing invented the mail box. Before this invention, people had to make a long trip to the Post Office to mail a letter.

Walter Sammons invented the comb.

Rev. Dr. Martin Luther King, Jr. said, "by the time we leave for work, Americans have depended on the inventions from the minds of Blacks."

Jimmy Webb at NOC Tonkawa March 8

Grammy award winning songwriter Jimmy Webb will be appearing at Northern Oklahoma College Tonkawa on Tuesday, March 8 as part of the NOC Renfro Lectureship Series.

The event was originally scheduled for April 2020 but was postponed.

Tickets already purchased for the event will be honored.

The event is sponsored by the Carl and Carolyn Renfro Endowed Lectureship Program and Northern Oklahoma College. Webb will appear in the Kinzer Performing Arts Center.

Webb, known as America's Songwriter and native to Oklahoma, has written songs that transcend generations and genres including Wichita Lineman, MacArthur Park, By the Time I Get to Phoenix, and Didn't We.

Individual tickets may be purchased for seating in the upper section of the Kinzer Performing Arts Center at a cost of \$20 each.

Tickets may be purchased by credit card by calling 580.628.6214

or in person at the NOC Development Office, Vineyard Library-Administration Building.

(photo by John Pickard/Northern Oklahoma College)

Rowlands earns Kegans scholarship

NOC sophomore Jaime Rowlands, who has been awarded the Nevona Kegans Scholarship for the 2022-2023 academic year. Rowland is an Athletic Training major from Portsmouth, England and is the daughter of Andy and Sarah Rowlands.

The Nevona Kegans scholarship is presented to an athletic training student attending the NOC Tonkawa Campus. Kegans was instrumental in establishing the athletic training pro-

gram at Northern. Rowlands is the third recipient of this award and will receive a \$500.00 scholarship.

Presenting the scholarship certificate to Jaime is Dr. Clark Harris, NOC President; Suzi Brown, NOC Health, Physical Education, and Recreation Division Chair and Jill Green, Director of Development and Donor Relations. Joining them are Nevona Kegans and Summer McClure, NOC Athletic Trainer.

Northern Oklahoma College cannot prevent you and/or any other attendees from becoming exposed to, contracting, or spreading COVID-19 while attending this event. Attendees choose to accept the risk of contracting COVID-19 and indemnify and hold NOC harmless from all liability. NOC will be following NOC's Pandemic Response Plan.

Lexie Boyer was named the recipient of the Leo Canaday Scholarship for Women's Basketball last Monday night. Pictured (L-R): Jill Green, Director of Development and Donor Relations; Kevin Boyer, Susan Boyer, Lexie Boyer, NOC President Dr. Clark Harris; Greg Krause, Lady Mavs head coach; Athletic Director Alan Foster. (photo by John Pickard/Northern Oklahoma College)

Boyer earns Leo Canaday scholarship

NOC's Lexie Boyer was named the Leo Canaday Memorial Scholarship recipient for the 2022-2023 academic year. Boyer is a freshman majoring in Elementary Education from McLoud, Oklahoma.

The Leo Canaday Memorial Scholarship was established by Leo's wife Pat, and through the generous support of family and friends. This scholarship provides students an opportunity to pursue their educational goals at Northern

Oklahoma College in Tonkawa and is presented to a member of the NOC women's basketball team.

Presenting the scholarship certificate to Lexie is Dr. Clark Harris, NOC President; Alan Foster, NOC Athletic Director and Jill Green, NOC Development and Donor Relations Director. Lexie is joined by her parents Susan and Kevin Boyer and Greg Krause, Head Women's Basketball Coach.

Life changing.
